iPhone® 6+	10.0+	1992x1080	8.1.7+
iPhone® 6	10.0+	1334x750	8.1.7+

* Notes:

With the release of PK v8.3, the PK8 iOS App requires the use of iOS 10.

As of January 1 2018, PatientKeeper no longer supports Apple devices running iOS 9 syncing against any PatientKeeper server version.

PatientKeeper's PK8 iOS App currently supports iPhone X running iOS11 in a "compatibility mode," which will not make use of the full screen resolution.

PatientKeeper's pending new iOS App will support iPhone x in full native mode. This App will reflect a new UI experience, is expected to be available in the app store by Q4 2018, and will be compatible with PatientKeeper server versions 8.2 and above.

Certified Android™ Devices

Supported PatientKeeper Products

- Mobile Clinical Results
- Mobile CPOE
- Patient List (version 2 only)
- PK Messaging

Operating Systems *	7.x 8.x
