| Device         | OS * | Screen Resolution      | Supported PatientKeeper Version |
|----------------|------|------------------------|---------------------------------|
| iPad Pro       | 8.0+ | 2048x1536<br>2732x2048 | 8.1.7+                          |
| iPad Air       | 8.0+ | 2048x1536              | 8.0.3+                          |
| iPad mini      | 8.0+ | 1024x768               | 5.1.1+                          |
| iPad 3, 4      | 8.0+ | 2048x1536              | 5.1.1+                          |
| iPad 2™        | 8.0+ | 1024x768               | 5.1.1+                          |
| iPhone® 7+     | 8.0+ |                        | 8.1.7+                          |
| iPhone® 7      | 8.0+ |                        | 8.1.7+                          |
| iPhone® 6s+    | 8.0+ |                        | 8.1.7+                          |
| iPhone® 6s     | 8.0+ |                        | 8.1.7+                          |
| iPhone® 6+     | 8.0+ | 1992x1080              | 8.1.7+                          |
| iPhone® 6      | 8.0+ | 1334x750               | 8.1.7+                          |
| iPhone® 5s     | 8.0+ | 1136x640               | 8.0.3+                          |
| iPhone® 5      | 8.0+ | 1136x640               | 5.1.1+                          |
| iPhone® 4/4S   | 8.0+ | 960x640                | 5.1.1+                          |
| iPod touch® 4+ | 8.0+ | 480x320                | 5.1.1+                          |

**\* Notes:**

PK will sunset support for iOS8 with the release of PK v8.2 in Q4 2016.

Once PK v8.2 is released, any PK8 iOS App syncing against a PK mobilizer will need to be running iOS9.

PK will sunset support for Mobile Clinical Browser with the release of PK v8.2 in Q4 2016.

## Certified Android™ Devices
