

CHARGE-NOTE RECONCILIATION

Help your organization identify every dollar it is entitled to – by automatically reconciling clinical notes to physician charges

Stand-alone charge capture systems have one main challenge – how to ensure that all reimbursable professional services have been charged. In the outpatient world, this is relatively simple – a visit equates to a charge. In the inpatient world, however, physicians are pulled in many directions – they see their own patients, they do consults, they cover for other physicians on their team, and more.

Patient	Financial Info	Admit/Scheduled Date	Discharge Date	Service Date	Charge Status	Billing Provider	Note Status	Note Author	Visit Provider
ANGELINE, MONA MRN: 02144779	Fin Class: Medicare Acct: 0214477981	02/05/17 09:00AM		02/09/17	Not Coded		Progress Note	NOLAN, GRACE	Att: CROSS, JASON Adm: TURNER, DOROTHY

This is the main report run for a provider who has access to see their department information.

ROI Scenarios

- A 50-physician hospitalist group on Long Island increased its revenue year-over-year by \$1.7 million.
- A hospitalist practice in Westchester County, New York identified 65 clinical notes with missing professional charges in just one week.

PatientKeeper® helps physicians keep track by using their notes to indicate when charges should be expected. Notes are the source of all truth – for patient care, for care team review, and for professional charges. If there was a note, then almost certainly there should be a charge.

PatientKeeper’s charge-note reconciliation tool automates the process of reconciling clinical notes and professional inpatient charges – from any EHR or billing system – to find the 10-15 percent of professional charges that many healthcare providers unknowingly fail to submit.

Key features and capabilities

PatientKeeper has a core competency and proven expertise in healthcare system integration, and in capturing and processing professional charges, born of nearly 20 years of experience. As a result, PatientKeeper can:

- Extract clinical notes from many different systems – and has done so at numerous client sites
- Link the authors of clinical notes to users in PatientKeeper, and provide insight into who saw a specific patient
- Reconcile charges and notes at the department level or the physician level
- Support practice management teams' efforts to find lost professional charges based on the presence of a clinical note
- Apply automated logic to optimize the charge capture process, ensuring that no billable service goes unnoticed

The screenshot displays the PatientKeeper interface for a patient named ANGELINE, MONA (92Y Female) with MRN 02144779. The interface is divided into several sections:

- Notes:** Contains a clinical note titled "EXAM" with vital signs (Temp: 101.2 F, HR: 106 /min, BP: 127/81 mmHg, RR: 26 /min, FSBC: 174 mg/dL) and physical exam findings under categories like CONSTITUTIONAL, RESPIRATORY, CARDIOVASCULAR, and GASTROINTESTINAL. It also includes lab results for PT/INR and BMP.
- Critical Care:** A central panel with tabs for "Charges" and "Diagnoses". The "Charges" tab shows a list of inpatient services such as "99231 IP subs 1 - 15 min" and "CC 135-164 min".
- Selected Codes:** A panel on the right showing "Charges" (No Charges) and "Diagnoses" (N17.0 Acute kidney failure with tubular necrosis, E11.29 Type 2 diabetes mellitus with other diabetic kidney complication, A41.9 Sepsis).
- Actions:** Buttons at the bottom include "Hold For Review", "Submit", "Submit Draft", "Send to Outbox", and "Cancel".

A user can display a note and enter the associated charge to ensure that they are selecting the correct information.
