

Note-Charge Reconciliation

Help your organization identify every dollar it is entitled to – by automatically reconciling clinical notes to physician charges

Stand-alone charge capture systems have one main challenge – how to ensure that physicians know which days should have been charged. In the outpatient world, this is relatively simple – a visit equates to a charge. In the inpatient world, however, physicians are pulled in many directions – they see their own patients, they do consults, they cover for other physicians on their team, and more.

ROI Scenarios

- **A 50-physician hospitalist group** on Long Island increased its revenue year-over-year by \$1.7 million.
- **A hospitalist practice** in Westchester County, New York identified 65 clinical notes with missing professional charges in just one week.

PatientKeeper® helps physicians keep track by using their notes to indicate when charges should be expected. Notes are the source of all truth – for patient care, for care team review, and for professional charges. If there was a note, then almost certainly there should be a charge.

PatientKeeper’s **note-charge reconciliation tool** automates the process of reconciling clinical notes and professional inpatient charges – from *any* EHR or billing system – to find the 10-15 percent of professional charges that many healthcare providers unknowingly fail to submit.

Patient	Financial Info	Admit/Scheduled Date	Discharge Date	Service Date	Charge Status	Billing Provider	Note Status	Note Author	Visit Provider

This is the main report run for a provider who has access to see their department information.

Key features and capabilities

PatientKeeper has a core competency and proven expertise in healthcare system integration, and in capturing and processing professional charges, born of more than 15 years of experience. As a result, PatientKeeper can:

- Extract clinical notes from many different systems – and has done so at numerous client sites
- Link the authors of clinical notes to users in PatientKeeper, and provide insight into who saw a specific patient
- Reconcile charges and notes at the department level or the physician level
- Support practice management teams' efforts to find lost professional charges based on the presence of a clinical note
- Apply automated logic to optimize the charge capture process, ensuring that no billable service goes unnoticed

A user can display a note and enter the associated charge to ensure that they are selecting the correct information.

About PatientKeeper

PatientKeeper® Inc. is the leading provider of healthcare applications for physicians. PatientKeeper's highly intuitive software streamlines physicians' workflow to improve productivity and patient care. PatientKeeper's CPOE, physician documentation, electronic charge capture and other applications run on desktop and laptop computers and popular handheld devices and tablets. PatientKeeper's software integrates with many existing healthcare information systems to support healthcare providers effectively in adopting technology, meeting MACRA requirements, and transitioning to value-based care. PatientKeeper has more than 60,000 active physician users today.
